

SPEED POLISH & WAX

Hot polish with wax

- ✓ Protective against weather influences
- ✓ Very easy to use
- ✓ Gives a nice deep shine
- ✓ Also suitable for chrome

PRODUCT DESCRIPTION:

SPEED POLISH & WAX is a light polishing care product that cleans well and gives a perfect gloss layer on painted surfaces, both metallic and non-metallic. Due to special components added in the Speed Polish & Wax, the surface is protected against weather influences and the adhesion of dirt is reduced. In addition, there are no scratches on plastic and Speed Polish & Wax does not leave white streaks on rubber and plastic.

APPLICATIONS:

Suitable for painted surfaces as well as for gelcoats. Furthermore, the Speed Polish & Wax can also be ideally used on chrome. Shake well before use. The surface must be clean and dry. Apply a thin, even layer with a damp cloth and then polish to a high gloss with a dry, soft cloth. Speed Polish & Wax can be easily brushed in and out manually without much effort. (Speed Polish & Wax can of course also be used with a polishing machine).

INSTRUCTIONS:

Before use, read and follow label instructions. Shake the Speed Polish & Wax well before use. Make sure the surface is clean and dry before you start. Apply a thin and even layer on the surface with a damp cloth and polish it to a high gloss with a soft dry cloth. Speed Polish & Wax can easily be brushed in and out with a polishing machine or manually without the need for much force.

Physical state	Liquid
Odor	Characteristic
Flashpoint	Above 100°C
